# Join the movement!

Consider adding #MyChausson to your posts!

In 1980, the first Chausson model was unveiled in Paris. It was called Odyssée 4000 and it was... a van!

Suffice it to say that "van culture", just like innovation, is a part of our identity.

Many of our customers have made their CHAUSSON their travelling companion and have shared their experience by sending us wonderful photos.

Join the movement as a CHAUSSON customer and share your fondest memories on Instagram and Facebook using the hashtag:

Panoramic view roof, rear side window on driver's side\*

\*V594S, V594Max: rear side window on driver's side can't be fitted on

← 5.41 m →

Perfect for going where you want, when you want, with complete discretion, including in your everyday life.

V594 S

*The ultra-compact vehicle*

Bathroom with pop-up toilet and window

**Maxi Cab:** take advantage of maximum room and a ceiling height that stays the same all along the length of your Chausson van

VIP ★★★★★

- Flyscreen door
- Heating using vehicle fuel digitally programmed and used while on the road

Foldable rear bed

← 5.99 m →

The V594S's big brother, available here in a 5.99 m version means it offers more space. Certainly one of the most tried-and-tested (and popular) layouts on the market.

# V594

*The Best Seller*

**+** FIRST LINE ★★ ★

- Rear opening windows
- Electric step
- Exterior awning
- Solar panel (120 W)
- Panoramic skylight

▲ Large rear bed, can be folded away if space is needed

▲ Specific to the FIRST LINE, the refrigerator is easily accessible from the inside and the outside of the van

← 5.99 m →

Measuring less than 6 metres, this model features 4 permanent beds. Chausson goes even further by making these beds removable for 2, 3 or 4 people.

## V594 MAX

*The family-friendly vehicle*

VIP

VIP

- Large sliding kitchen drawers
- Bathroom with folding partition

VIP

VIP

Detachable rear double beds

← 6.36 m →

It has both a proper garage area and a generous XXL sleeping area. Its secret?

An electric fold-down bed (above the garage area) which can be accessed without a ladder when the garage hold is not in use.

# V690

## The adventurer

### During the daytime

The storage space is functional: resistant covering, stowage hooks, etc.

### At night-time

In its low position, the size of the bed is incredibly generous

In its intermediate position, the bed also serves to create the garage hold

**+** PREMIUM ★★★★★

■ Flat windows

■ Wooden shower duck board

← 6.36 m →

Chausson has succeeded in meeting the difficult challenge of equipping a van with 2 good-sized twin beds. You'll love its smart storage solutions such as its double floor under the bed for storing the camping table and chairs.

**V697**

*The modular vehicle*

**VIP** ★★★★★

■ **VPS insulation** for a high sound and thermal insulating power

**The optional "towing" equipment can in certain cases change the number of passengers on the car registration papers.** Your dealer will be able to give you more information.

**Weight ready for use:** empty weight ready for use includes the driver's weight (75 kg) and 20L (vans) / 1L (motorhomes) clean water, 90% of fuel and 100% of gas. The empty weights ready for use on the list take into account only standard equipment upon shipment from the factory. European regulations tolerate a difference of +/- 5% on empty weight ready for use. The vehicle maker reserves the right to modify.

**You may be able to find certain heavy accessories like large blinds or generators in the marketplace.** The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.

**Clean water reservoir capacity (approved for our low profiles); capacity is 20L (vans) / 1L (motorhomes), must comply with regulations vis up to the user to adapt loads and the number of passengers to the vehicle's loaded weight.** To do this, clean water reservoir capacity can be adjusted by the user to avoid reducing the number of passengers.
