CHAUSSON
Exploring new horizons

UN VOYAGE D'AVANCE

An advance journey

Discover your van's production unit

- An industrial site with the latest technology that's dedicated to manufacturing vans.
- Specialized, qualified team for the development and manufacture of vans.
- Production capacity designed to meet the expectations of the various European markets.

Hello! I'm Slipper, your new guide to Chausson motorhomes. I'm here to introduce you to our complete brand range. Come along with me to discover lots of innovations and tips about our products. You'll also be able to share your personal experiences and enthusiasm with others. Whenever I appear, you're sure to find something interesting! See you soon - on our website, in your dealer's showroom and at trade fairs.

TRIGANO

Chausson is a subsidiary of the Trigano Group: Europe's number one in recreational vehicles.

**Better than a guide...
an enthusiastic friend!**

Journey... with the van of the future!

Because innovation is at the heart of what we do, if you are driving a Chausson van you are always travelling in a vehicle ahead of its time.

Staying faithful to our values, the new range has been designed to be forward thinking.

You will discover the detail of the advantages of the Flex Box system and also our new packs which will enable you to design your ideal van.

So that you can find your way among all these innovations, put your trust in Slipper, a new help and guide you as you choose and who will share with you our Chausson passion. Thanks to Slipper your future van will be just what you want!

HERTZ, the world's leading rental company has chosen Chausson... Solid proof of our reliability!

For the French market only.

High-quality basic equipment shared by all our vans

The Fiat chassis, an essential element for high-quality travel

Fiat is still THE reference brand on the motorhome market and the reliability of the Ducato is well established. The Fiat equipment chosen by Chausson has everything you need to broaden your horizons with optimal comfort and full safety.

- 1 ▶ Driver's airbag,
- ▶ braking assistance (ABS): an anti-lock system that keeps wheels from blocking when brakes are applied intensively,
- ▶ anti-slipping (ASR): a system that regulates acceleration to keep the driving wheels from losing traction,
- ▶ six-speed gearbox.
- 2 ▶ Very comfortable "Captain's chair" seats: these new Fiat seats have a built-in headrest, a wider back, better lateral support, two armrests and a seated position that's more comfortable than ever. They pivot 180°. After pivoting, the seats can be slid forward to get them close to the eating area. They are height- and angle-adjustable as a standard feature.
- 3 ▶ Cab radio pre-equipment, with four loudspeakers,
- ▶ electrically controlled windows,
- ▶ central bottle-carrier console with a cell phone compartment.
- 4 ▶ Central locking of cab doors.
- 5 ▶ Hubcaps on wheels, tyre repair kit.
- 6 ▶ Cab carpet

High-quality insulation

All Chausson vans benefit from the new VPS (Van Protection System) insulation. The van is fully covered with polyester fiber insulation that fits perfectly to the metal structure.

VPS provides:

- ▶ better insulation (heating/cooling),
- ▶ suppression of thermal bridges,
- ▶ better heat distribution,
- ▶ reduced energy consumption,
- ▶ better sound insulation.

L'isolation VPS

Comfortable equipment

- ▶ High-quality bedding
Our main bedding comes with a sturdy slatted base as a standard feature for greater comfort and ventilation.
- ▶ Clever storage
All our rear beds can be raised for easy access to storage areas. Every little nook and cranny is used for storage.
- ▶ High-end seating
The foam in our cushions is specially designed to provide firm comfort for seating.
- ▶ Slide-out washbasin
Slide-out washbasin allows re-arranging the shower and toilet area (except V594S and models with central shower).

V594, options: VIP pack

a real fully-equipped kitchen

- ▶ A real gas stove top
Kitchen equipped with two gas burners. A protective glass cover is available. When open, the cover protects walls from cooking splatters; when closed, it becomes a work area.
- ▶ Refrigerator in upper position
With storage area below (except V594S and models with central shower).
- ▶ Inside table
All our models have a table extension.
- ▶ Outside table
Our vans are equipped with an outside attachment for a table, depending on the model.

5 GOOD REASONS TO CHOOSE A CHAUSSON

Well-designed lighting

- 100% LED lighting on the inside
100% LED lighting provides ten-fold savings in energy and a product lifecycle that is thirty times longer. A bright choice for you and the planet!

Heating can be used on the road

- You can use all our heating systems on the road with no constraints.
This is ideal for your passengers and very handy for heating the unit before you stop thus creating the ambient temperature for your arrival.

Easy accessibility

- Just one key
Just one key for both vehicle and doors.
No more cumbersome key sets!
- Useful day and night
The bathroom, kitchen and closet are easy to access both day and night at any time.

Useful pre-equipment

- TV pre-equipment
Whatever the version, all our vans have at least one 220 V/12 V TV-antenna outlet.
Satellite antenna pre-equipment with D+.

7 year guarantee

At Chausson, the choice of materials starts with quality, it needs to be reliable and durable. Which is why our vans have a 7-year weatherproofing guarantee.

Multifunctional as well

With the Flex Box modular system and ergonomic solutions, Chausson innovation improves life on board and means you can use your vehicle on a daily basis, not just on holiday.

Design

Beyond our priority of optimising the space available for storage, choosing a Chausson van is choosing the guarantee of an internal design that incorporates the latest trends in interior design.

Leading from the front with Grade 3!

Chausson vans have successfully passed the heating tests to meet the European Standard EN 1646-1. The principles behind these tests are simple: The vehicle is placed in a room with a temperature of -15°C. The temperature inside the van should then reach 20°C within 4 hours of the heating being switched on. The Chausson vans managed to reach this in 3.5 hours, which enabled them to meet the standard for the coveted GRADE 3. A performance that is due to the quality of the materials selected as well as the way the vans are built.

165 dealerships

To look after your van, as carefully as possible, our distribution network is only made up of real leisure vehicle specialists. Chausson offers one of the widest and best equipped European networks on the market.

BASIC EQUIPMENT 115

2 L
115 HP (85 kW)*

THE NEW TWIST V594S WILL SOON BE IN OUR DEALERSHIPS!

Like the larger models it will be available in 4 engine sizes, 6 colours for the bodywork and 3 different interior designs. Also available with the VIP and ELEGANCE packs as well as all the options of the other models.

All technical characteristics (texts and photos) valid at the time of printing (august 2018) are provided by Chausson for general guidance. They may be subject to modification, often because of technical progress. Non-contractual document. Since Chausson is committed to the environment, this publication has been printed on PEFC paper from sustainably managed forests. Where there are multilingual versions, the French text is the binding version.

- The optional "towing/motorcycle carrier" equipment can in certain cases change the number of passengers on the car registration papers. Your dealer will be able to give you more information.
- Weight ready for use: empty weight ready for use includes the driver's weight (75 kg) and the maximum reserve of water in circulation, 90% of fuel and 100% of gas. The empty weights ready for use on the list take into account only standard equipment upon shipment from the factory. European regulations tolerate a difference of +/- 5% on empty weight ready for use. The vehicle maker reserves the right to modify.
- Accessories and equipments fitted as an option are not included when determining the weight. Their weight should therefore be deducted from the available payload.
- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.
- Clean water reservoir capacity must comply with regulations vis up to the user to adapt loads and the number of passengers to the vehicle's loaded weight. To do this, clean water reservoir capacity can be adjusted by the user to avoid reducing the number of passengers.
- Some models photographed in this catalogue may be shown with equipment supplied as an option. The characteristics of photographed models may vary from one country to the next. Despite the care taken in producing this catalogue, this cannot be viewed as a contractual document. Chausson reserves the right to modify its models without prior notice. Chausson cannot be held liable for any modifications made by its suppliers nor typographical errors when printing these documents. It is forbidden to reproduce, even partially, text or document. Do not litter the public highway.
- Your retailer is at your disposal to advise you and provide you with any additional information.
- Where there are multilingual versions, the French text is the binding version.
