(1) please specify when ordering in order to establish COC document with 3.65 T
(2) except 514, 515, 520, 634, 650, C656
(3) 160-180 HP: as standard
(4) coupling for motorbike requires a specific COC document for registration
(5) except 514, 515, 520, 634, 650, C514 - automatic gearbox not available
(6) with automatic gear box (3,5 T), towable weight: 750 kg (PTRA 4250 kg)

- The optional “towing” equipment can in certain cases change the number of passengers on the car registration papers. Your dealer will be able to give you more information.
- Weight ready for use: empty weight ready for use includes the driver’s weight (75 kg) and the maximum reserve of water in circulation, 90% of fuel and 100% of gas. The empty weights ready for use on the list take into account only standard equipment upon shipment from the factory. European regulations tolerate a difference of +/- 5% on empty weight ready for use. The vehicle maker reserves the right to modify.
- Accessories and equipments fitted as an option are not included when determining the weight. Their weight should therefore be deducted from the available payload.
- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.
- Clean water reservoir capacity (approved for our overcabs/low profiles/A class); capacity is 1 L, must comply with regulations wis up to the user to adapt loads and the number of passengers to the vehicle’s loaded weight. To do this, clean water reservoir capacity can be adjusted by the user to avoid reducing the number of passengers.
