# FIRST Line

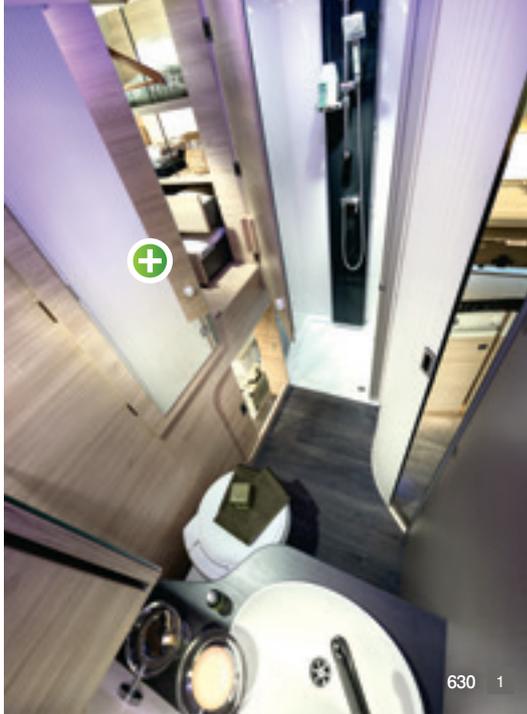

## The essential comes as standard.

The number one advantage of First Line is its price,  
but note that this is not to the detriment of  
its equipment or design!

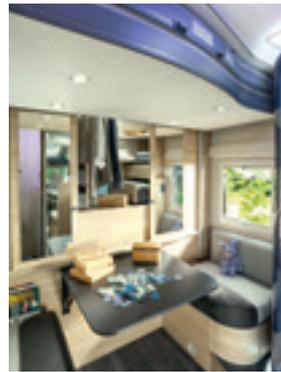

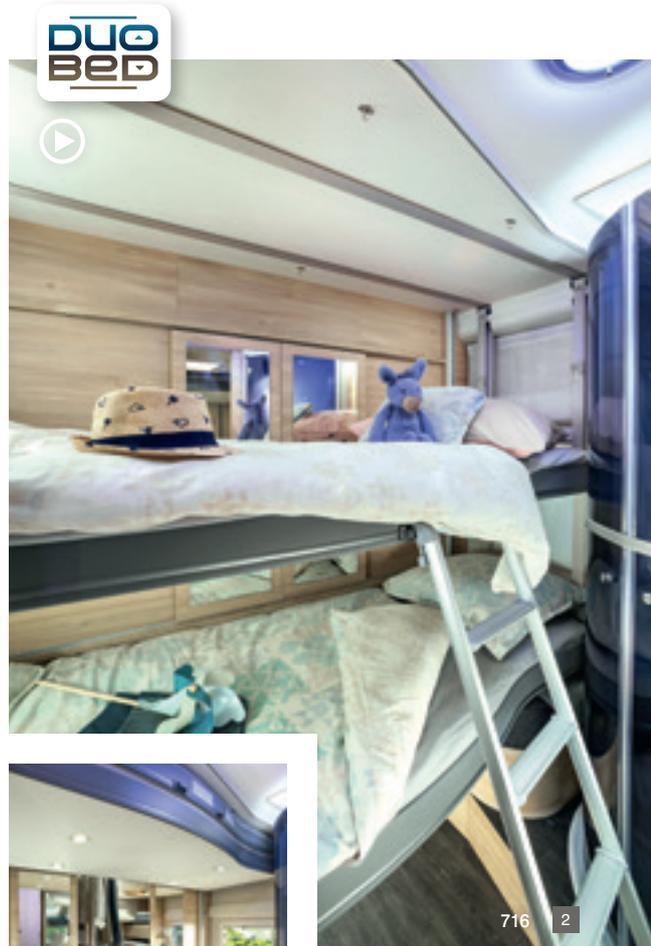

At Chausson, we remain loyal to our strategy based on the right price:  
Everything that we think is essential for travelling, sleeping,  
dining and living in a motorhome is supplied as standard!

ISOFIX

- 1 / Maxi bathroom with a very spacious shower stall and wardrobe.
- 2 / Unique on the market, our hideaway bunk beds will adapt to your needs: the space can be transformed into a lounge or a bedroom with one or two beds.

- 3 / All our island beds are height-adjustable so that the garage area can be modified.
- 4 / All our twin beds are equipped with an integrated system convertible in XXL bed.

**IRP structure:**  
 GRP on roof/floor/sides,  
 Styrofoam insulation,  
 floor 64 mm thick,  
 roof 55 mm thick

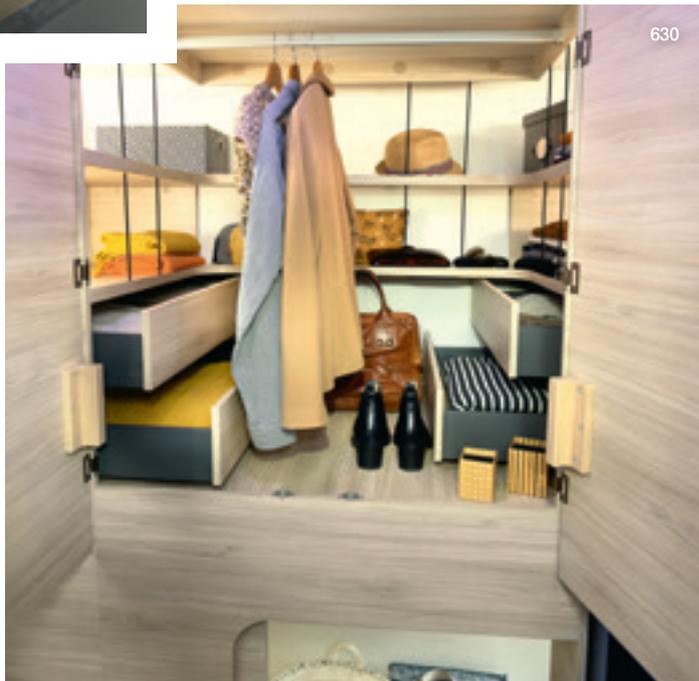

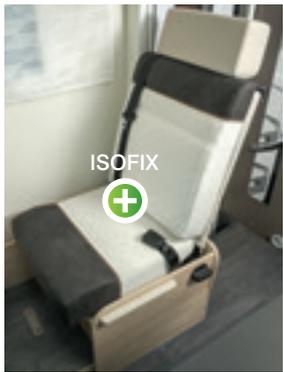

**as standard**

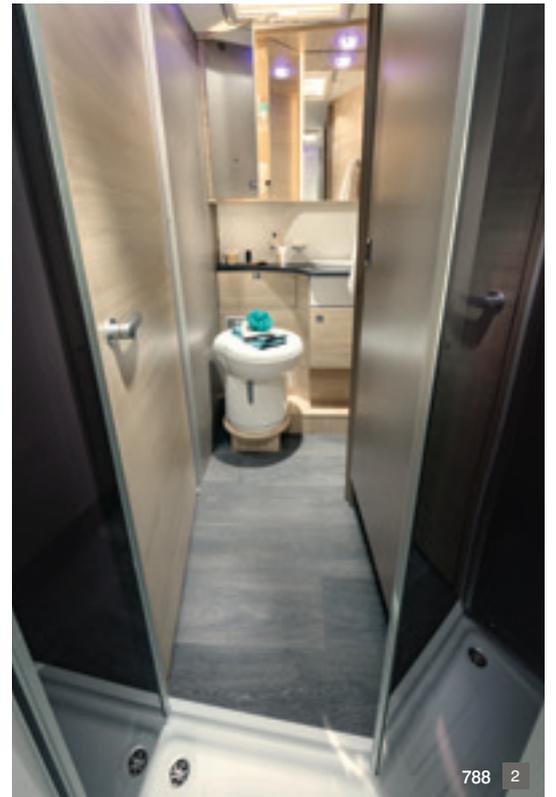

Pan drawer, spices rack, bottle rack. 

Exclusive padded fabrics. 

Smart

- Weight ready for use: empty weight ready for use includes the driver's weight (75 kg) and the maximum reserve of water in circulation, 100% of fuel and 100% of gas. The empty weights ready for use on the list take into account only standard equipment upon shipment from the factory. European regulations tolerate a difference of +/- 5% on empty weight ready for use. The vehicle maker reserves the right to modify.
- Accessories and equipments fitted as an option are not included when determining the weight. Their weight should therefore be deducted from the available payload.
- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.
- Clean water reservoir capacity for homologation (approved for our low profiles) is 1 L, it must comply with regulations wis up to the user to adapt loads and the number of passengers to the vehicle's loaded weight. To do this, clean water reservoir capacity can be adjusted by the user to avoid reducing the number of passengers.
